

DIRK PADFIELD

Seattle, WA
USA

dirkpadfield@gmail.com
www.dirkpadfield.com

Qualifications

- 13 years industrial research experience developing segmentation, tracking, and registration algorithms for quantitative image analysis with a focus on graph-theoretic algorithms, wavelets and Fourier analysis, level-sets and fast-marching, interactive algorithms, mathematical modeling, classification, and machine learning.
- 5 first-author journal publications, 2 book chapters, 33 peer-reviewed conference publications, and 14 issued patents.
- Extensive C++ and Python programming experience for developing algorithms, and 6 years as an active developer of the open-source C++ Insight Toolkit (ITK)
- Delivered products for automated retail image quality assessment; cell segmentation, tracking, and registration; molecular pathology tissue classification; automated aircraft blade defect detection; interactive CT lung nodule segmentation; and PET nodule detection.
- Participated in successful funding applications for the NLM, NIH, and GE Healthcare.

Education

- **Rensselaer Polytechnic Institute**—Troy, NY
Ph.D. in Computer Science: Graduated May 2009
 - GPA: 4.0
 - Thesis title: “Segmentation and Tracking Algorithms for Monitoring Cellular Motion and Function”
- **Pennsylvania State University**—University Park, PA
M.S. in Electrical Engineering: Graduated May 2002
 - GPA: 3.96
 - Thesis title: “Integrated Image Registration and Tracking of Endoscopic Video and 3D CT Images”
 - Earned a 3-year National Science Foundation (NSF) Graduate Fellowship Award
 - Earned a National Science Foundation (NSF) Summer Program in Taiwan Award
- **Pennsylvania State University**—University Park, PA
B.S. in Electrical Engineering and B.S. in International Studies: Graduated May 2000
 - GPA: 3.84
 - Thesis title: “Gerdien Condenser Data Reduction and Analysis Using MATLAB Graphical User Interfaces”
- **American University in Cairo**—Cairo, Egypt
Two semesters of study abroad: 1997-1998

Work Experience

- **Amazon**—Seattle, WA
Senior Research Scientist: September 2014-present
 - Developing novel machine learning and image analysis algorithms for large-scale image quality assurance in a big data environment. Responsible for collecting data through SQL queries, data cleaning for classifier training, designing algorithms for detecting quality criteria, evaluating algorithms on large-scale data, pushing the algorithms to production, and developing and monitoring metrics for measuring performance over time.
- **GE Global Research Center**—Niskayuna, NY
Senior Computer Scientist: November 2002-September 2014
 - Invented novel segmentation, tracking, and registration algorithms for biomedical/medical image analysis applications with particular focus on microscopy, molecular pathology, and ultrasound.
 - Invented a robust graph-theoretic object tracking algorithm based on the minimum-cost flow approach to solve multiple assignments in a consistent framework. Demonstrated the tracking of over 400,000 cells by matching detections that account for the cell behaviors of splitting, merging, entering, leaving, moving, and dying. Published in the IPMI conference and the Medical Image Analysis journal.
 - Designed a method and derived the equations to embed the spatial masking step of registration into the Fourier domain to enable fast masked image registration. Demonstrated the algorithm for translation, rotation, and scale on a wide range of applications. Contributed the C++ implementation to the Insight Toolkit (ITK). Published in the CVPR conference and the Transactions on Image Processing journal.
 - Discovered and derived the "magic sigma", a family of sigma values that enable the extract representation of a discrete Gaussian kernel whose entries are integers and powers-of-two. This enables efficient convolution through bit-wise shifts without the need for floating-point operations, which is especially important for mobile and embedded devices. Published in the CVPR conference.
- **Rensselaer Polytechnic Institute**—Troy, NY
Adjunct Faculty: Spring 2014
 - Taught a graduate-level course on Biological Image Analysis
- **The National Science Foundation (NSF) and the National Science Council of Taiwan**—Taoyuan, Taiwan, R.O.C.
Research Scientist: Summer 2002
 - Studied and presented seminars on algorithms for human DNA database queries
- **The National Aeronautics and Space Administration (NASA)**—Goddard Space Flight Center, Greenbelt, MD and Andoya Rocket Range, Andenes, Norway
Research Scientist: Summer 1999 and Summer 2000
 - Constructed, tested, and launched noctilucent cloud measuring devices with NASA

Programming Experience

- **Programming Languages:** C/C++, Python
- **Software Libraries:** ITK, VTK, Matlab, L^AT_EX
- **Version Control:** GIT, SVN, CVS
- **IDEs:** Eclipse, Xcode, Visual Studio
- **Operating Systems:** Linux, Mac, Windows

Language Experience

- **Languages:** English (fluent), Norwegian (fluent), Arabic (working), German (working)

Professional Service

- Served on the organizing committee of ISBI 2015 and ISBI 2016 conferences
- Journal reviewing: Elsevier Medical Image Analysis, IEEE Medical Imaging, IEEE Image Processing, IEEE Biomedical Engineering, IEEE Information Technology in Biomedicine, Cytometry, Journal of Microscopy, Optical Engineering, Annals of Applied Statistics
- Conference reviewing: IEEE CVPR, IEEE ICCV, MICCAI, IEEE ISBI, IEEE ICIP, IEEE EMBC

Peer-Reviewed Journal Publications

Issued Patents

- [1] P. Mendonca, **D. Padfield**, C. Aladahalli, S. Liu, and T. Broniak. Systems and methods for determining parameters for image analysis. Issued Patent, April 2016. Patent number: US9,324,155.
- [2] Y. Al-Kofahi, **D. Padfield**, and A. Seppo. Systems and methods for using an immunostaining mask to selectively refine ISH analysis results. Issued Patent, September 2015. Patent number US9,135,694.
- [3] X. Liu and **D. Padfield**. Automatic segmentation and characterization of cellular motion. Issued Patent, June 2015. Patent number US9,070,004.
- [4] Y. Al-Kofahi, **D. Padfield**, and A. Seppo. Method and systems for cell-level FISH dot counting. Issued Patent, May 2015. Patent number US9,042,631.
- [5] A. Santamaria-Pang, J. Rittscher, **D. Padfield**, A. Can, Z. Pang, M. Bello, F. Ginty, C. Sevinsky, Q. Li, M. Rothney, and B. Sarachan. System and method for multiplexed biomarker quantitation using single cell segmentation on sequentially stained tissue. Issued Patent, March 2015. Patent number US8,995,740.
- [6] P. Annangi, J. Banerjee, and **D. Padfield**. Methods and systems for estimating gestation age of a fetus. Issued Patent, September 2014. Patent number US8,845,539.
- [7] N. Subramanian, A. Narasimhamurthy, S. Thiruvankadam, and **D. Padfield**. Methods and apparatus for automated measuring of the interventricular septum thickness. Issued Patent, May 2014. Patent number US8,715,183.
- [8] J. Rittscher, R. Bhotika, K. Mosaliganti, **D. Padfield**, and R. Machiraju. Methods and systems for automated segmentation of dense cell populations. Issued Patent, April 2014. Patent number US8,712,139.
- [9] M. Bello, J. Rittscher, A. Yekta, **D. Padfield**, and J. Tu. Systems and methods for automated extraction of high-content information from whole organisms. Issued Patent, April 2014. Patent number US8,687,857.
- [10] **D. Padfield**, J. Rittscher, A. Can, U. Adiga, E. P. Roquemore, and X. Li. System and method for detecting and eliminating one or more defocused or low contrast-to-noise ratio images. Issued Patent, November 2013. Patent number US8,588,503.
- [11] D. Gao, **D. Padfield**, D. Henderson, K. Kenny, R. McKay, V. Baxi, R. Filkins, and M. Montalto. Image quality assessment including comparison of overlapped margins. Issued Patent, March 2013. Patent number US8,396,269.
- [12] **D. Padfield**, M. Datar, and H. Cline. Segmentation of tissue images using color and texture. Issued Patent, May 2011. Patent number US7,949,181.
- [13] **D. Padfield**, J. Rittscher, N. Thomas, and T. Sebastian. Time-lapse cell cycle analysis of unstained nuclei. Issued Patent, October 2010. Patent number US7,817,841.
- [14] P. Mendonca, **D. Padfield**, M. Turek, and J. V. Miller. Edge detection and correcting system and method. Issued Patent, September 2008. Patent number US7,433,086.
